Subject: Recommendation for Adam Trickett

To Whom It May Concern:

Adam worked as a Full-Stack Developer specialising in the build and optimisation of WordPress websites for our clients for almost 12 months. However, due to changes in organisational structure and challenging economic conditions, we were unable to retain his position within the business.

His core responsibilities whilst employed with us were as follows:

- Working with WordPress, Shopify and Statamic websites (implement designs, install themes and plugins, upgrades/maintenance, testing, etc.)
- Working with Laravel, Tailwind and Vue.js to build and extend our existing and future products and applications
- Working with HTML, CSS, PHP and Javascript to develop supporting services for client websites
- Supporting the team by participating in code reviews, general troubleshooting and solution architecture

Adam is a skilled professional who is passionate about his work and always strives to deliver the best results for his employer/clients. He always demonstrated a strong sense of ownership of his projects, was a team player and worked effectively with our clients and colleagues.

Sincerely,

Patrick Breheny  
Group General Manager
